

Typical Configurations

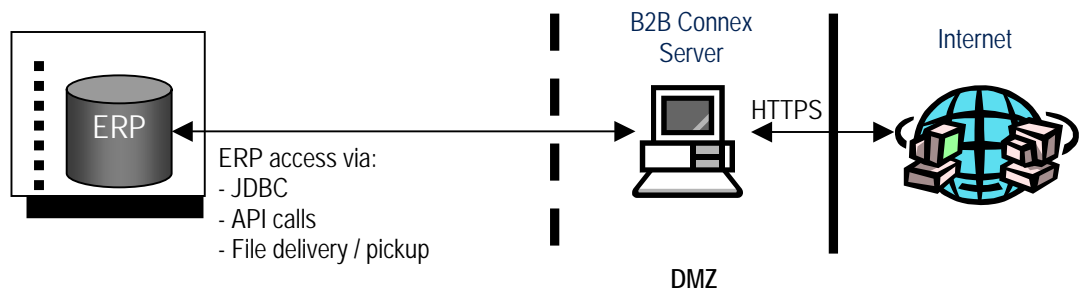

- **With Proxy Server**

In the most secure configuration, the B2B Connex Portal Server is installed behind the firewall. A Proxy Server (such as Microsoft ISA server) is installed in the DMZ to manage the external access to the B2B Connex application.

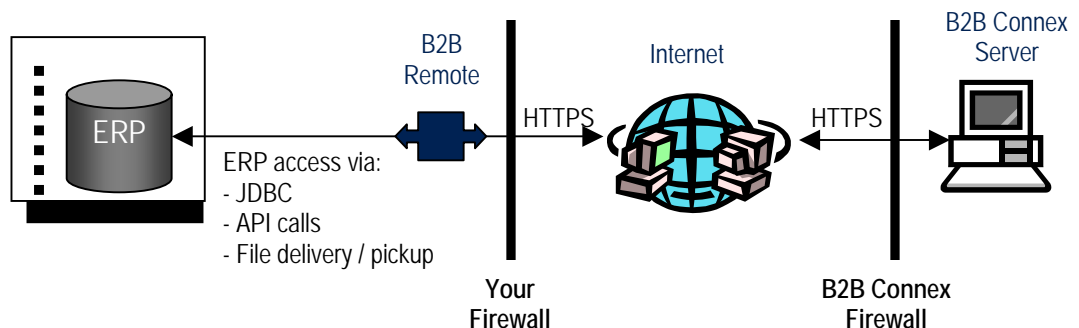

- **Without Proxy Server**

The B2B Connex Portal Server is installed within the DMZ. Access to the ERP data (PO's, RFQ's, etc.) is done through "holes" punched through the firewall from the DMZ to the internal network.

- **Using B2B Connex Inc. as an ASP (Application Service Provider)**

B2B Connex can be run in an ASP model using a secure server hosted by B2B Connex Inc. A small program called B2B Remote is used to manage the transfer of data between the ERP system and the B2B Connex Server.

Technical Requirements

Operating Systems Supported

B2B Connex software will run on any of the following:

- Windows NT, 2000, 2003, or XP
- Linux
- Unix

Recommended Hardware

Volume	Number of Documents per Year	Memory Size	Disk Size	Processor
Low	Less than 1,000	512 MB	40 GB	Single P4, 3 GHz
Medium	Between 1,000 and 5,000	1 GB	System 40 GB Database 100 GB	Dual P4, 3 GHz
High	Greater than 5,000	2 GB	System 40 GB Database 100 GB	Dual P4, 3.6 GHz

Databases Supported

- Oracle – all versions
- SQL Server – all versions

The B2B Connex CD includes all required software; customers do not have to buy 3rd party software except for an operating system and SQL Server or Oracle

Configuration Considerations

Firewall:

- B2B Connex must have access to the Internet
- B2B Connex must have access to your ERP systems (or business computer systems) on your local area network

Security:

- B2B Connex supports certificate security, it is the responsibility of the customer to obtain their own certificates

URL:

- The customer should create a URL for their partners to connect to in order to run the B2B Connex modules (e.g. B2B.MyCompany.com)

B2B Connex Inc.

B2B Connex Inc. has been in business for over a decade, providing leading edge solutions to business communication problems. We focus on providing easy to use, turnkey applications that will increase your productivity to maximize your return on investment.
